ABSTRACT OF THE DISCLOSURE

2 A road skeleton estimation system generates an estimate as to a skeleton of at least a portion
3 of a roadway ahead of a vehicle. The road skeleton estimation system includes an image receiver
4 and a processor. The image receiver is configured to receive image information relating to at least
5 one image recorded ahead of the vehicle. The processor is configured to process the image
6 information received by the image receiver to generate an estimate of the skeleton of at least a
7 portion of the roadway ahead of the vehicle.
